

Conductor AWL System

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

Description

Conductor AWL System

PLP's Conductor AWL system is ideal for Transmission lines near airports where night warning of the presence of the conductor is critical, especially in remote locations or river crossings. The conductor AWL system is installed directly on the conductor and uses energy directly from the conductor line.

Features

- Used near airports and terrain where night warning lights on transmission lines are needed
- Night warning lights are installed directly on the conductor
- Designed in accordance with the International Civil Aviation Organization (ICAO) and the Federal Aviation Administration (FAA) standards
