

Eye-Lag Screw

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

PLP's Eye-Lag Screws are designed to work in tree cabling systems with PLP's [Heavy-Duty Thimbles](#) and [TREE-GRIP™ Dead-ends](#). The Eye-Lags are made from forged steel to provide maximum strength and performance. Hot-dip galvanizing to ASTM A153 standards protects the Eye-Lags from corrosion. Available in two sizes 1/2" and 5/8" to meet your needs. Each size is complete with lag threads, a shoulder, and cone point for ease of installation. With minimum breaking strengths of 11,000 lbs. for 1/2", and 17,500 for 5/8", PLP's Eye-Lag Screws will work well with your other tree cabling hardware.

Features

- Available in two sizes to meet your load requirements
- Use with PLP's TREE-GRIP Dead-ends and Heavy-Duty Thimbles to complete the cable/bracing product line
- Compatible with traditional cable bracing hardware as well as the complete line of PLP arborist products
