

FIBERLIGN™ NEOPRENE PREFORMED DEAD END

Made of high quality aluminium wire, the FIBERLIGN™ Neoprene Preformed Dead End is designed for termination of PVC jacket electrical conductor between poles. The helix is completely coated in black neoprene rubber to severely but gently terminate the electrical conductor, distributing radial compressive forces uniformly through the plastic jacket without damaging the conductor.

| Catalog Number | Description | Conductor Diameter Range | | | | Color Code | Overall Length | |
|-----------------|--|--------------------------|-----------|-----------|-----------|------------|----------------|--------|
| | | Min. (mm) | Max. (mm) | Min. (in) | Max. (in) | | mm | inches |
