

FIBERLIGN[®] Dielectric Suspension for ADSS

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **FIBERLIGN[®] Dielectric Suspension** is specifically designed for installation on ADSS cables and is different than FIBERLIGN[®] Suspension for OPGW. Due to the relatively fragile nature of the plastic jackets and nonmetallic strength members of ADSS, special care and features are incorporated into the design of the FIBERLIGN Dielectric Suspension.
