

Galvanized BIRD-FLIGHT™ Diverter

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **Galvanized BIRD-FLIGHT Diverter** is designed to make guyed structures visible to birds and provides an economical means of reducing the hazard to both lines and birds.

The BIRD-FLIGHT Diverter is lightweight, offers little wind resistance, and is easily and quickly applied by hand. The positive grip of the diverter on the cable ensures that it remains in the applied position and cannot move along the cable under aeolian vibration or other conditions.
