

FIBERLIGN® Splice Trays

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

Description

FIBERLIGN® Fiber Optic Splice Trays are suitable for use in all PLP® Splice Cases and splicing applications. The storage trays provide ample room for storing fiber and allow for a generous bend radius designed to assure long term optical performance. There are now two types of trays offered. The standard thermal-formed tray is available for all closures and splice applications. The ADOBE™ Splice Tray is available as a lower cost alternative and is interchangeable with many of the thermal-formed trays. Both versions of the splice tray include a clear snap-on cover, felt tape for protecting buffer tubes, and tie wraps to secure the buffer or transport tubes to the tray. To find splice trays for a specific closure and specific splicing application, refer to the desired closure section of the catalog.
